## PERSONAL PROJECTS

### Face Recognition Model (03/2021 - 04/2021)

- Face Recognition is a method of indentifying or verifying the identity of an individual using their face.
- developed the model using HaarCascade Classifier.

### App Design- made Instagram clone (01/2023 - 02/2023)

- Designed UI similar to that of Instagram using Figma

### Fashion Web Design (02/2023 - 02/2023)

- created a design of a fashion store, having various clothing options.

### AI Jarvis Voice Assistant (09/2020 - 10/2020)

- Made AI Jarvis voice assistant with the help of python. This assistant saves a lot of time.
- After making this project , now I have a very good hold on function and loop concepts.
- The main aim behind this project was to learn.

### Worked in a Short Film (01/2022 - 03/2022)

- Worked as a Video Editor in the short film
- Cleaning, Trimming, Sound design, Colour Grading
